Preface

Configurable Preselect is a perfect extension for the store owners who wants to add combination to cart by one click.

- Select an associated item of configurable product, which you would like to show by default from first options selected or set by product option from backend.
- Configurable Preselect is an appropriate tool to show some popular combination to customers at once.
- Cut down time to figure out the options.
- User Friendly and flexible configuration.
- Compatible with Most of the Browser.

Installation

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually Install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended)

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory If code directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management.

Step 4: Enter the following at the command line:
`php bin/magento setup:upgrade and php bin/magento setup:static-content:deploy`

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores -> Configuration -> Advanced -> Advanced, the module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory If code directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management
Edit app/etc/config.php file and add one line code:
'Mageants_ConfigurablePreselect' => 1

Step 4: Enter the following at the command line: `php bin/magento setup:upgrade and php bin/magento setup:static-content:deploy`

Step 5: Disable the cache under System -> Cache Management

Step 6: Once you complete above steps log out and log in back to the admin panel and switch to Stores -> Configuration -> Advanced -> Advanced, the module will be displayed in the admin panel.

Configuration

After Installation of Extension log in to magento admin panel for set configuration of the extension.

From second option, you can select option to display frontend preselect options. You can select from backend product page (select from product) or display first preselect option (First options)

as per below screenshots you can enable/disable this extension here.

The screenshot shows the Magento Admin Configuration page for the MageAnts extension. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, and Reports. The main content area is titled 'Configuration' and includes a search icon, a notification bell, and a user profile 'admin'. Below this is a 'Store View' dropdown set to 'Default Config' and a 'Save Config' button. The 'MAGEANTS' section is expanded, showing 'Configurable Preselect Option' selected. The 'Configurable Preselect Option Settings' section contains two dropdown menus: 'Enable [store view]' set to 'Yes' and 'Preselect for All Configurable Products [store view]' set to 'Select from Product'. Blue arrows point to these dropdowns with the text 'set yes to enable extension' and 'Here you can select config option for frontend display preselect options' respectively.

Back-end Example:

Edit associated product of configurable product where you can see 'Is Default Selected' attribute and set it 'Yes'.

Configurations

Configurable products allow customers to choose options (Ex: shirt color). You need to create a simple product for each configuration (Ex: a product for each color).

Add Products Manually
Edit Configurations

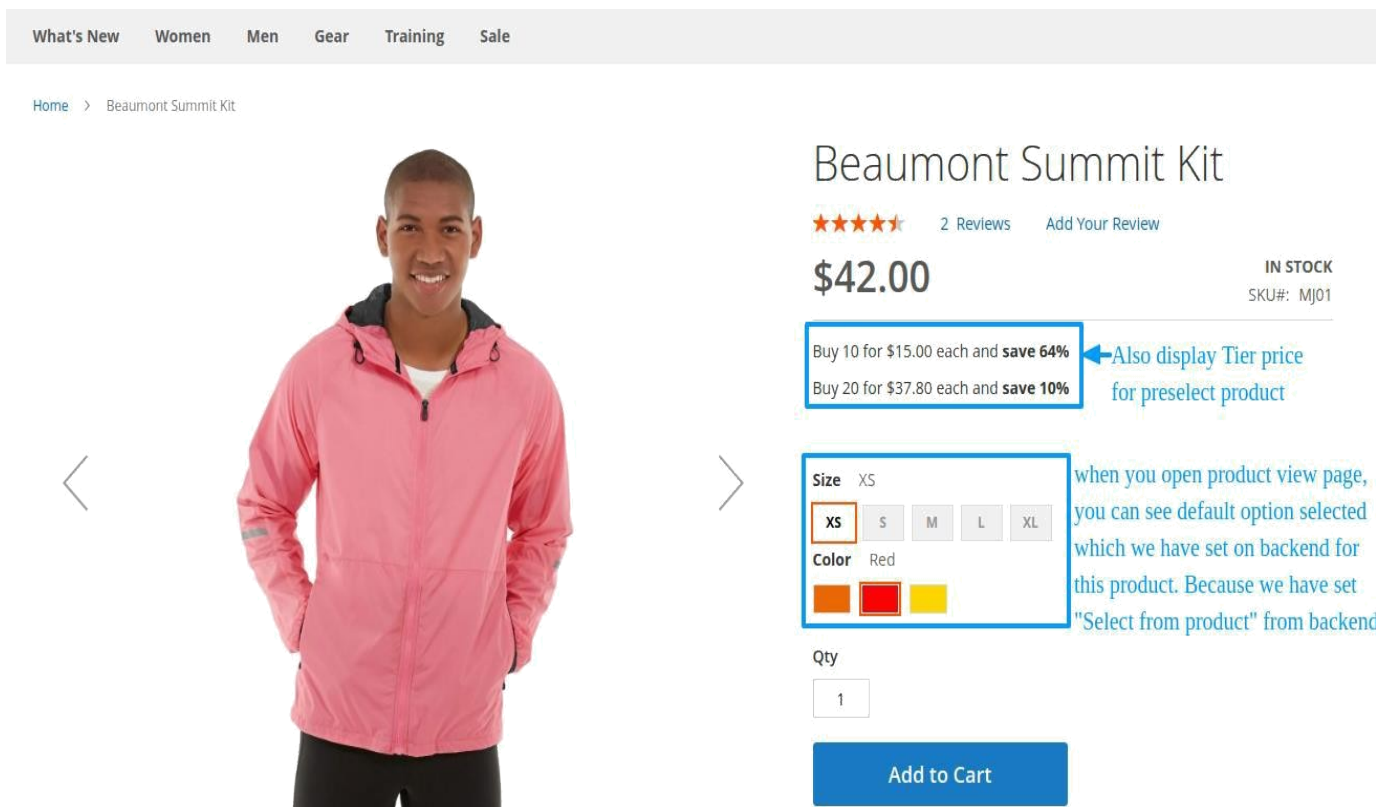

Current Variations we have added custom default column, store admin can select the default product to get selected in front end
