Preface

Almost websites are having multistore or multi websites in single setup. Very often store owner needs to redirect visitors to particular store view and also needs to set currency for particular zone. Magents has best solution for all store owner who feel needs like this. Mageants introduce GEOIP switcher which allow store owner to swtich store, switch external url and set currency as well.

Installation

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually Install extension.

Option 1: Magento 2 install extension using COMMAND LINE

(Recommended)

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory if code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:

```
php bin/magento setup:upgrade
```

Step 5: Once you complete above steps logout and login back to the admin panel and switch to Stores → Configuration → Advanced → Advanced, the module will be displayed in the admin panel.

Option 2. Magento 2 install extension manually

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory if code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management

Edit app/etc/config.php file and add one line code:

```
'Mageants_GeolpStoreSwitcher' = 1
```

Step 4: Disable the cache under System → Cache Management

Step 5 : Once you complete above steps logout and login back to the admin panel and switch to Stores → Configuration → Advanced → Advanced, the module will be displayed in the admin panel.
