Preface:

- This extension will give you a fast and smooth add-to-cart process. Give customers the ability to add your products to cart without refreshing the page with Magento AJAX Add to Cart extension.
- This module saves the customers' time by allowing them to collectively purchase products without any delay or refreshing the page. It adds the item to the cart while customers are still browsing for more items. You can also enable other useful features in Magento quick add to cart module such as dialogue box, display related products and animations to facilitate your customers. Products can be added to shopping cart immediately without reloading the page. When they click Add to Cart , a pop up promptly presents cart details and especially displays up sell, cross sell or related products. This tool is designed to improve an online stores usability, page performance, conversion rate, as well as cope with a shopping cart abandonment.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
`php bin/magento setup:upgrade`
`php bin/magento setup:static-content:deploy`

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Ajax cart.
The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management Edit
app/etc/config.php file and add one line code: 'Mageants_Ajaxcart' → 1

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the
admin panel and switch to Stores → Configuration → Mageants →
Ajaxcart, the module will be displayed in the admin panel.
