CMS Import Export Introduction.....	5

Preface

Using "CMS - Pages & Static Block Import/Export" extension you can export and import bulk CMS Pages & Static Blocks from one server to another via CSV Files. This enables us to import bulk CMS pages / Static Blocks with a single csv file while changing the server.

Installation

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually Install extension.

Option 1: Magento 2 install extension using COMMAND LINE **(Recommended)** Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory if code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line: **php bin/magento setup:upgrade**

Option 2. Magento 2 install extension manually

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory if code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code: **'Mageants_CMSImportExport' = 1**

Step 4: Disable the cache under System → Cache Management

Import CMS Blocks.

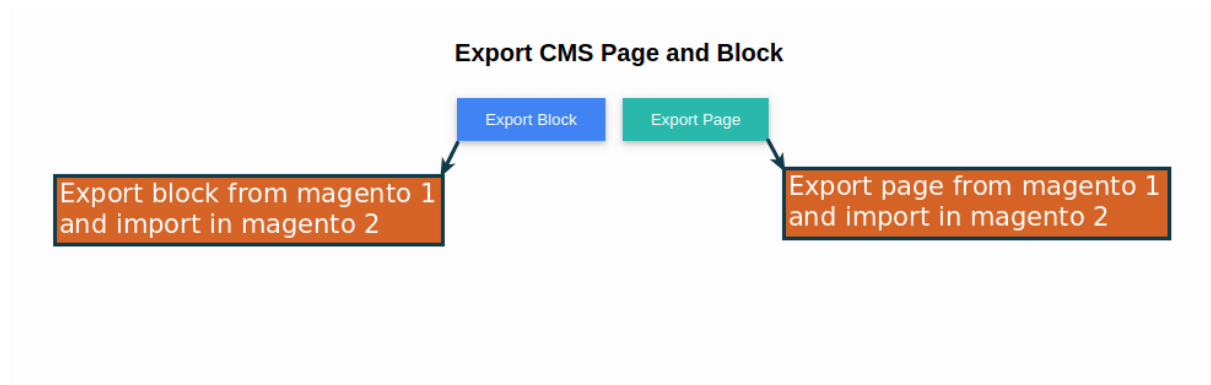

This screenshot shows the 'Import CMS Blocks' interface in a Magento 2.1.5 admin panel. The page has a dark sidebar on the left with 'CONTENT' and 'SYSTEM' tabs. The main area is titled 'Import CMS Blocks' and includes a 'Back' link. A yellow banner at the top contains a message: 'It's time to change your password.' Below this, there is a 'Choose file' button with the text 'No file chosen' next to it. A 'Start Import' button is positioned to the right. A checkbox labeled 'Replace CMS blocks if already exists' is located below the file selection area. Three orange callout boxes with arrows point to these elements: 'Select file import CMS blocks' points to the 'Choose file' button; 'Click start import button to import CMS blocks' points to the 'Start Import' button; and 'Select this checkbox to replace CMS blocks if already there' points to the 'Replace CMS blocks if already exists' checkbox. The footer of the page shows the Magento logo, copyright information for 2018, and links for 'Account Activity' and 'Report Bugs'.

Import CMS Pages

This screenshot shows the 'Import CMS Pages' interface in a Magento 2.1.5 admin panel. The layout is identical to the 'Import CMS Blocks' page, featuring a sidebar, a title, a 'Back' link, a password change banner, a 'Choose file' button, a 'Start Import' button, and a 'Replace CMS pages if already exists' checkbox. Three orange callout boxes with arrows provide instructions: 'Select file import CMS pages' points to the 'Choose file' button; 'Click start import button to import CMS pages' points to the 'Start Import' button; and 'Select this checkbox to replace CMS pages if already there' points to the 'Replace CMS pages if already exists' checkbox. The footer includes the Magento logo, copyright information, and links for 'Account Activity' and 'Report Bugs'.
