Preface :

- Magento 2 Custom Price Extension by Mageants allows the admin to convert simple, configurable, downloadable, and grouped products into custom price products to accept customer's price for these products.
- This extension allows the admin to set custom label for custom price text-box that will display on the product view page and category page.
- This extension allows the admin to set a different minimum custom price for simple, configurable, downloadable, and grouped products or can set a global minimum custom price for simple, configurable, and downloadable products.
- This extension allows the admin to set a custom error message that will be displayed when the customer enters a custom price less than the minimum custom price.
- This extension allows the admin to select customer groups from the backend for which the customer group admin wants to enable the extension.
- This extension allows the admin to import custom price using csv file.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to **Stores** → **Configuration** → **Mageants** → **Custom Price**, the module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exist then create.

Step 3: Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code:
'Mageants_CustomPrice' → 1

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to **Stores → Configuration → Mageants → Custom Price**, the module will be displayed in the admin panel.

Backend example :

After Installation of Extension login to Magento admin panel to set configuration of the extension.

Extension Configuration :

You will find below configurations at this path
Stores > Configurations > Mageants > Custom Price.

The screenshot displays the Magento Admin Configuration interface for the 'Custom Price' extension. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main configuration area is titled 'Configuration' and shows the 'Custom Price' configuration for the 'Default Config' scope. The configuration includes: 'Enable Custom Price' (Yes), 'Frontend Label For Custom Price' (My Custom Price), 'Custom Price Options' (Global), and 'Minimum Custom Price' (40). Red callout boxes provide instructions: 'Select Yes to Enable Custom Price Extension', 'Enter Label for CustomPrice Textbox', 'Select the custom price option value as either Global or Product Wise', and 'Enter minimum custom price for Global Custom Price'.

Enable Custom Price : You can enable/disable the custom price module by selecting Yes or No.

Frontend Label For Custom Price : You can set your custom label for the custom price text box which will display on frontend.

Custom Price Options : You can select the custom price option value either Global or Product Wise.

- When you select the custom price option value as **Global** then for all the simple, configurable, and downloadable products Custom Price is enabled and the minimum custom price is set by what you add in the **Minimum Custom Price** field.
- When you select the custom price option value as **Product Wise** then you have to set a custom price for simple, configurable, downloadable, and grouped products from the product edit page that you want to enable as a custom price product.

Minimum Custom Price : You can set the minimum custom price for simple products. This custom price only works when Custom Price Option is selected as **Global**.

The screenshot shows the 'Configuration' page for 'Minimum Custom Price'. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main content area is divided into sections: SALES, YOTPO, DOTDIGITA, SERVICES, and ADVANCED. The 'ADVANCED' section is expanded, showing two fields: 'Frontend Error Message [store view]' and 'Enable For Customer Group [store view]'. The 'Frontend Error Message' field contains the text: 'You can not add Custom Price less than {backend_custom_price}.' The 'Enable For Customer Group' field shows a list of customer groups: 'General', 'Wholesale', and 'Retailer'. A 'Save Config' button is located in the top right corner. Two orange callout boxes with arrows point to the 'Frontend Error Message' and 'Enable For Customer Group' fields, containing the following text: 'Enter error message that you want to display on frontend when customer enters price less than minimum custom price' and 'Select the customer groups for which you want to enable custom price extension' respectively.

Frontend Error Message : You can set an error message that will be displayed when a customer enters a price less than the minimum custom price.

Enable For Customer Group : You can select the customer group for which you want to Enable Custom Price Extension.

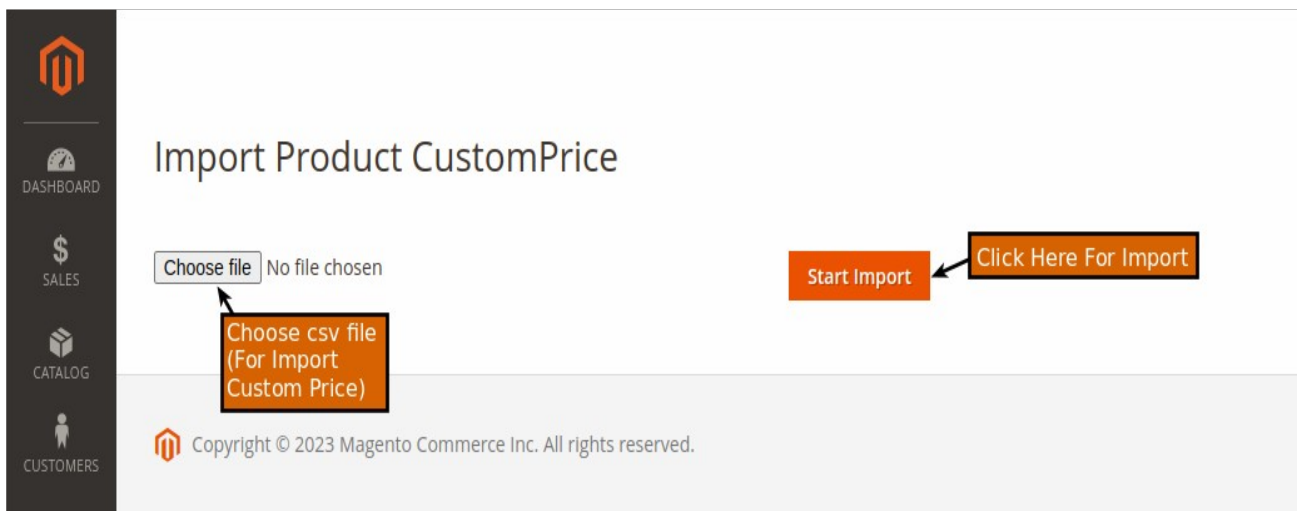

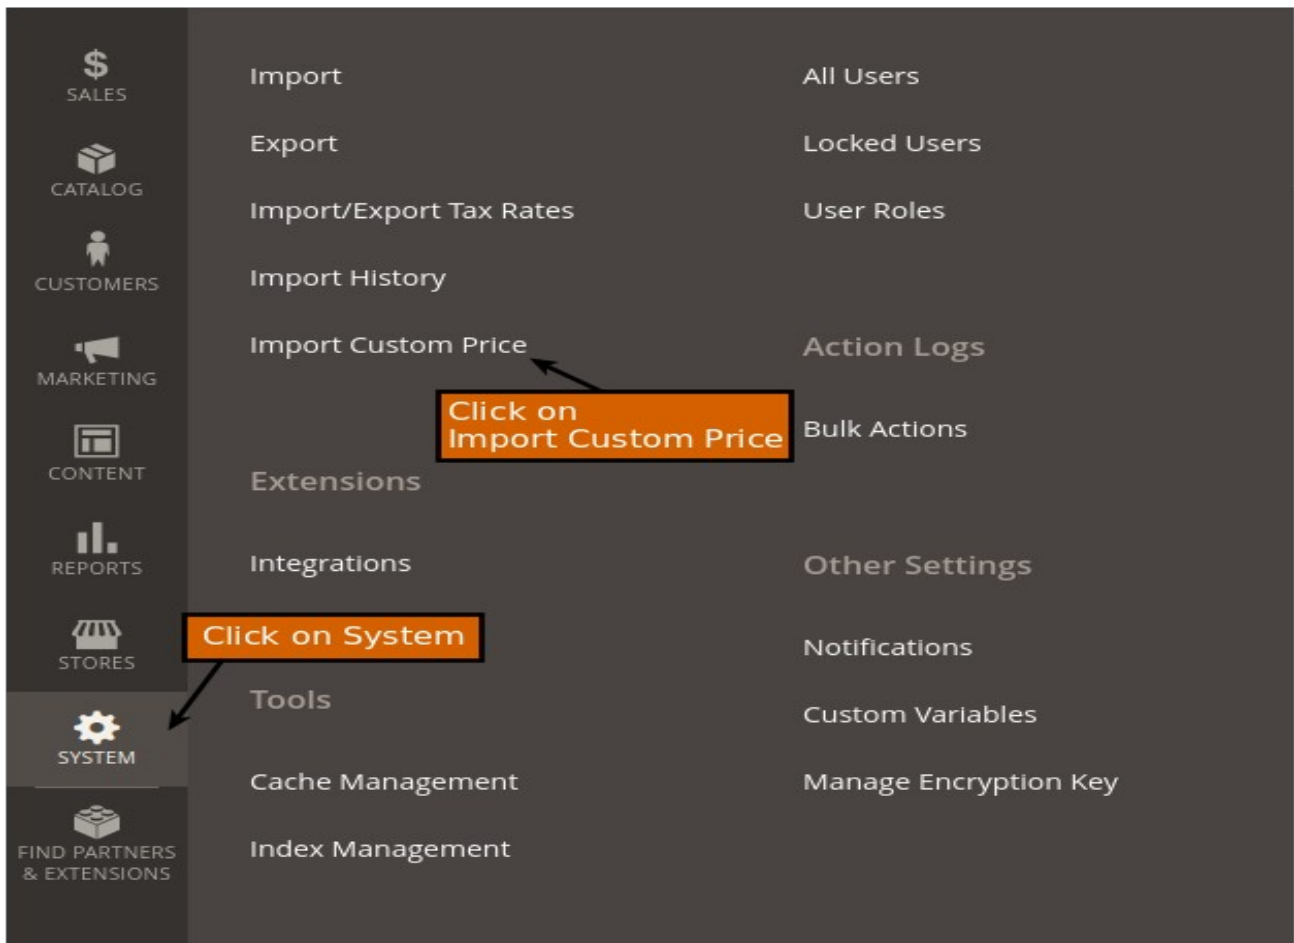

Product Edit Page : From the Product Edit page, you can enable/disable custom price and you can set a minimum custom price for a particular product.

The screenshot shows the 'Joust Duffle Bag' product edit page. The left sidebar contains navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main content area has a top bar with 'Back', 'Add Attribute', and 'Save' buttons. Below this, there are several sections: 'Product Salable Quantity', 'Design', 'Schedule Design Update', 'Gift Options', and 'Custom Price'. The 'Custom Price' section is expanded, showing a 'Custom Price [global]' dropdown menu set to 'Enable' and a 'Minimum Custom Price [global]' input field containing '60'. Two callout boxes with arrows point to these fields: one pointing to the 'Enable' dropdown with the text 'Set Enable/Disable Custom Price for Particular Products', and another pointing to the '60' input field with the text 'Enter Minimum Custom Price for Particular Product'. Below the 'Custom Price' section is a 'Downloadable Information' section.

Custom Price : You can enable/disable custom price for a particular product by selecting Enable or Disable as per your requirements.

Minimum Custom Price : You can set the minimum custom price for a particular product. This custom price only works when Custom Price Option is selected as **Product Wise**.

- You will find Import Custom Price on the below path :- **System > Import Custom Price.**

Frontend Example :

Category Page View:

When the Custom Price Option value is set as **Global** then All the Simple, Configurable, and Downloadable Products are enabled for custom price and the default price of particular will be hidden.

The screenshot shows a Magento category page for 'Bags'. The breadcrumb trail is 'Home > Gear > Bags'. The page title is 'Bags'. There are 14 items displayed in a grid. A 'Sort By' dropdown menu is set to 'Position'. On the left, there are 'Shopping Options' filters for STYLE, PRICE, ACTIVITY, MATERIAL, STRAP/HANDLE, FEATURES, PERFORMANCE FABRIC, ERIN RECOMMENDS, NEW, and SALE. Below the filters are sections for 'Compare Products' (no items) and 'My Wish List' (no items). A product overlay for the 'Joust Duffle Bag' is shown, featuring a 'Custom Price' input field, an 'Add to Cart' button, and a heart icon. The grid includes the following products: Joust Duffle Bag (2 reviews), Strive Shoulder Pack (2 reviews), Crown Summit Backpack (3 reviews), Wayfarer Messenger Bag (3 reviews), and a grey backpack with red accents.

When the Custom Price Option value is set as **Product Wise** and then selected the Product for an enabled custom price the default price of a particular product will be hidden.

Product Page View :

The screenshot shows the product page for 'Joust Duffle Bag' on the LUMA website. The page includes a navigation menu with 'What's New', 'Women', 'Men', 'Gear', 'Training', and 'Sale'. The breadcrumb trail is 'Home > Gear > Bags > Joust Duffle Bag'. The product image is a dark blue duffel bag. To the right, the product title 'Joust Duffle Bag' is displayed, along with the text 'Be the first to review this product'. The status 'IN STOCK' and 'SKU#: 24-MB01' are shown. The 'Custom Price' field is empty, and an orange callout box with an arrow pointing to it says 'Enter Custom Price For Particular Product'. Below the price field is a 'Qty' input field with the value '1' and an 'Add to Cart' button. At the bottom, there are links for 'ADD TO WISH LIST' and 'ADD TO COMPARE'.

Display Error Message In Product Page View :

The screenshot shows the product page for 'Joust Duffle Bag' on the LUMA website, similar to the previous one. However, the 'Custom Price' field now contains the error message 'Please Enter Custom Price' in red text. An orange callout box with an arrow pointing to the error message says 'When the customer tries to add to the cart without entering a custom price this error will display.' The 'Add to Cart' button is still present and visible.
