Preface:

- Duplicate Categories Magento extension allows you reduce the duplication time from days to few minutes. For each category you want to duplicate, you can set any parent category. You can duplicate categories with or without related categories and products.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Duplicate category. The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code: 'Mageants_Duplicate category' → 1

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Duplicate category, the module will be displayed in the admin panel.

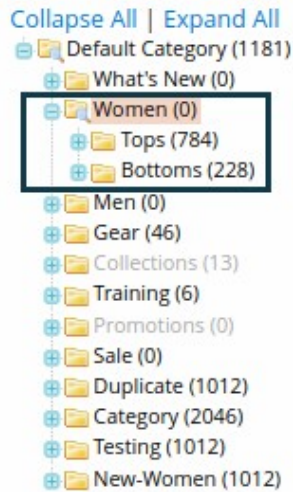

Backend example

After Installation the Extension, Go to → Store → Configuration → Mageants → Duplicate Categories Configuration,

The screenshot shows the Magento Backend Configuration page. At the top, there is a yellow notification bar that reads: "One or more Integrations have been reset because of a change to their xml configs." and "System Messages: 2". Below this, the page title is "Configuration". On the left sidebar, the "MAGEANTS" menu is expanded, and "Duplicate Categories Configuration" is selected. In the main content area, the "Duplicate Categories Configuration" section is visible, with a dropdown menu set to "Yes". A red box with the text "Enable module" and a downward arrow points to the dropdown menu. A "Save Config" button is located in the top right corner.

The screenshot shows the Magento Backend Category page for "Women (ID: 20)". At the top, there is a yellow notification bar that reads: "One or more Integrations have been reset because of a change to their xml configs." and "System Messages: 2". Below this, the page title is "Women (ID: 20)". On the left sidebar, the "CONTENT" menu is expanded, and "Women (0)" is selected. In the main content area, the "Duplicate Categories" button is highlighted with a red box. A red box with the text "You will find a duplicate category button when edit a category button." and an arrow points to the "Duplicate Categories" button. The "Duplicate Categories" button is located next to the "Delete" and "Save" buttons. The "Enable Category" and "Include in Menu" checkboxes are checked. The "Category Name" field contains "Women".
