Preface:

- Using the Force Login extension, the store manager can disable the frontend page without logging in, so the customer has to log in to view the desired pages.
- Using this, store manager has an option to disable customer registration at your store.
- Using this, store manager has an option to set custom alert message which displayed on login page.
- User Friendly and flexible configuration.
- Easily Enable/Disable form admin.
- This Extension allows you to Enable/Disable following pages.
 - Product page.
 - Category page.
 - Cart page.
 - Checkout page.
 - Search page.
 - Advanced search page.
 - Contact page.
 - CMS page.
 - Custom Url.
- Admin can also hide third-party extension's pages.
- Admin can set page to redirect after logging in.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Forcelogin. The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory. If code directory does not exist then create.

Step 3: Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code: 'Mageants_Forcelogin' → 1

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Forcelogin, the module will be displayed in the admin panel.
