<b>Frontend Example .....</b>	<b>14</b>

## **Preface :**

- Blog is a fully featured blogging suite. It's a perfect way to provide your Customers with valuable content. By Adding Blog to your Store you can write Blog Articles.

### **This extension is providing below functionalities.**

- Add Related Products
- Display Recent Posts
- Display Featured Posts
- Pin Post at The Top
- Preview Posts
- Social Sharing Buttons
- Add Comments in Posts
- Add Related Post Through Tag

## Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

### **Option 1: Magento 2 install extension using COMMAND LINE** (Recommended).

Follow below steps to install extension from the command line.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory.  
If code directory does not exists then create.

**Step 3:** Disable the cache under System → Cache Management.

**Step 4:** Enter the following at the command line:  
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Blog. The module will be displayed in the admin panel.

## Option 2: Magento 2 install extension manually.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory. If code directory does not exist then create.

**Step 3:** Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code: 'Mageants\_Blog' → 1

**Step 4:** Disable the cache under System → Cache Management.

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Blog, the module will be displayed in the admin panel.

## Backend example :

Admin can set configuration as per below screenshot.

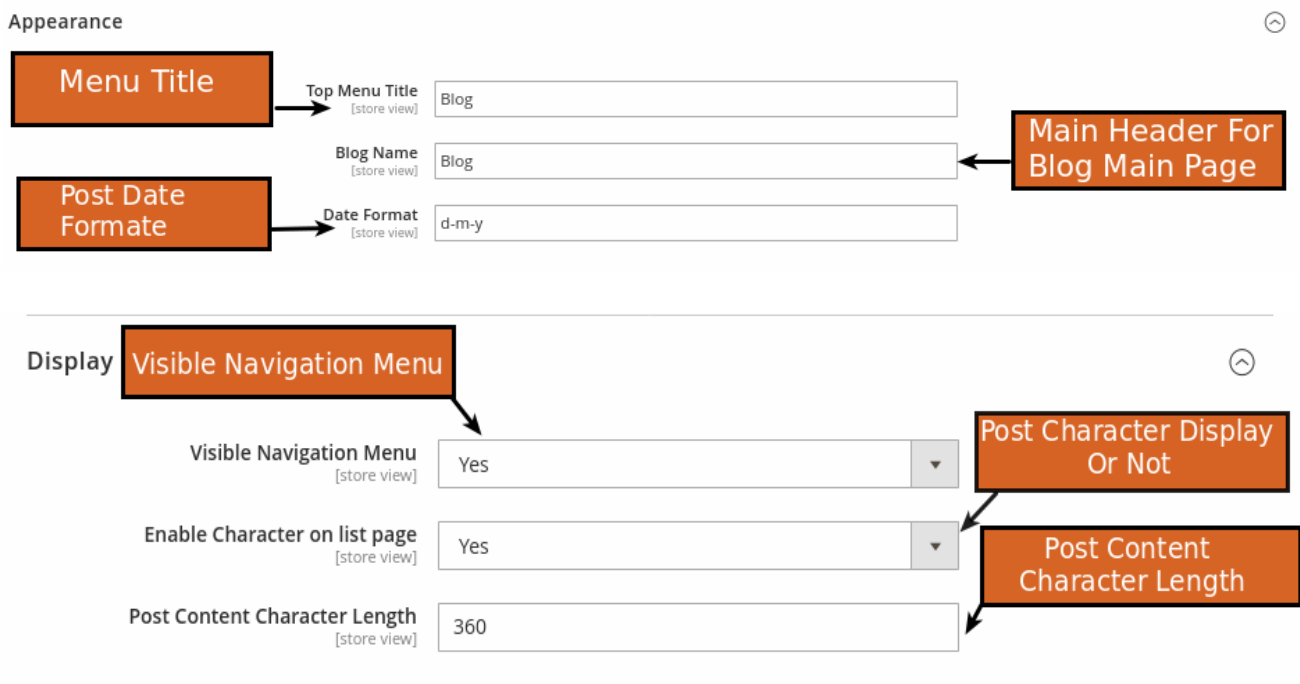

## Extension Configuration :

You can set **Blog Details & enable/disable**

Please go to **Stores ⇒ Configuration ⇒ Mageants ⇒ Blog.**

In **Enable**, choose Yes to enable the extension, or No to disable it.

## Search Engine Optimization

**Meta Title For Blog Main Page** → **Base Meta Title** [store view]   Use Website

**Base Meta Description** [store view]   Use Website → **Meta Description For Blog Main Page**

**Generated Posts Pages Suffix** → **Base Meta Keywords** [store view]   Use Website → **Keywords For Blog Main Page**

**Generated Categories Pages Suffix** → **URL Suffix for Posts** [store view]   Use Website

**URL Suffix for Categories** [store view]   Use Website

## Comments

**Enable Post Comments** → **Comments Enable** [global]  ▼

**Number Of Show Comment Replies** → **Number of Comments** [store view]  ← **Number Of Show Comments**

**Installation process**  
A major marketing channel for any online store is creating additional content that explains the brand and products it sells, which is typically done through a blog. This gives customers one more possibility to look at your store and items you sell, and make a better informed decision on buying. At the end of the day there is a question of what will be more effective, a Magento 2 Blog Extension or a standalone Wordpress? Let's try to summarize all the pros and cons of using both of these solutions by picturing 8 key characteristics that concern every store owner as they select a content marketing tool.

**Store integration**  
As we discussed above, the Magento 2 blog extension is not only quite easy to install, but also integrates with your current store templates, giving you a variety of additional opportunities:

- blog articles can be displayed with related products;
- the last post can be displayed on the desired store page, etc.

Moreover, you don't need to customize your blog design, since most blog extensions adopt your store theme look automatically. This is a pros #2 for Magento 2 blog extension.

---

A major marketing channel for any online store is creating additional content that explains the brand and products it sells, which is typically done through a blog. This gives customers one more possibility to look at your store and items you sell, and make a better informed decision on buying. At the end of the day there is a question of what will be more effective, a Magento 2 Blog Extension or a standalone Wordpress? Let's try to summarize all the pros and cons of using both of these solutions by picturing 8 key characteristics that concern every store owner as they select a content marketing tool:

#### Installation process

The first concern for both store owners and developers is whether there is a smooth and easy installation process. Most of the Magento 2 blog extensions can be installed on-the-go – fast and easy, just like any other module. Moreover, it can simply integrate with your store's current template, which presents you with a variety of additional opportunities to consider. As a result, you get a solid product.

Store Blog extension at this point equals Content Marketing solution. This might be the strong pros #1 of Magento 2 blog module. Regarding Wordpress, everybody understands it's a stand-alone entity and an experienced developer is required to deal with its installation. Store developer needs to configure the WP blog and create its database. As a result, you get two different entities: Magento 2 Store + Wordpress Blog for Content Marketing Solution.

#### Store integration

As we discussed above, the Magento 2 blog extension is not only quite easy to install, but also integrates with your current store templates, giving you a variety of additional opportunities:

- blog articles can be displayed with related products;
- the last post can be displayed on the desired store page, etc.

Moreover, you don't need to customize your blog design, since most blog extensions adopt your store theme look automatically. This is a pros #2 for Magento 2 blog extension.

What about Wordpress? Since Wordpress works as a stand-alone entity, it has very little in terms of integration options. Furthermore, it's required to adapt its design to fit the store theme.

#### Features Set and functionality

Wordpress is winning in its functionality and features set. The Magento 2 blog extension typically has a feature set which covers only the basic blogging necessities. Adding more functions to the blog extension would cost you additional time and money.

#### SEO features

To get the most out of your content, considering the SEO functionality of a blog solution is a must. Wordpress has an advanced SEO features set, the store blog on it will be fully optimized and all its content is available in most of the search engines. Magento 2 blog extension has basic SEO features.

#### Plugins potential

You're likely to need some additional features for your blog, like an image gallery or captcha, etc. What possibilities can you reach using each of the suggested solutions? Wordpress plugin set is limited only by your imagination – you may find almost any add-on you wish. Magento 2 blog extension in its turn doesn't have any plugins, but your store developers can always fix this, but it will cost more than in case of Wordpress existing plugins.

#### Customers registration differences

Since Magento 2 blog extension builds in a store template, customers only need to register just once to access both shop and blog accounts, using the same login and password. Wordpress is not so flexible on this matter since it's a standalone entity. Store customers should register and access their blog and shop accounts separately. It's safe to say this is not so convenient.

#### Code concerns

Now let's take a closer look at the coding aspects, which might be the main concern of every Magento 2 developer. With the Magento 2 blog extension, you get a common visible open-source code that your store developers can enjoy and easily extend at any time. Besides, it's really stable and simple. If you choose Wordpress as a blog solution for your Magento 2 store, you get an open-source, but unfamiliar code to your developers. They will have to spend some time handling and customizing it. The code structure and style in Wordpress is completely different from that of Magento.

#### Posting blog articles

There's still one more point to consider before making a big decision on a blogging solution for your store, and that's article posting frequency.

Consider before making a choice, how frequently would you plan to post to your store blog? If it is 1-3 times per week or even fewer, you can safely choose any blog extension for your store. For more than 5 posts a week, you should consider installing Wordpress.

#### Summary

Every shop is unique and has its own business model, so it's totally up to you whether to install the Magento 2 Blog Extension or Wordpress as your store's blog solution. There are several decent blog extensions on the market, so you've got options when choosing them. Some of the blog modules for Magento 2 stores are FREE and you can safely conduct test drives at no charge.

Get the most out of your blog with the Magento 2 blog extension or Wordpress, depending on you, your shop business goals, and content marketing strategy!
