## Preface

call for price is perfect extension for the store owners who wants to hide the price and add to cart button for the specific products and this action will force customer to inquire of price of that product. Once you enable this extension in your store as described above it hides the price for the product and put the button named configure from admin. When customer click on this button it opens popup having inquiry form with Google captcha. Once customer fill up this form and submit then

Administrator will get notified and inquiry data will get saved in backend.

- Easy to configure extension.
- Customer Group selection for hide price of product.
- Google captcha use for security purpose.
- Add To Cart button configuration from admin panel.
- All Inquiry information on admin panel and on admin mail.
- Responsive pop-up form of CallForPrice inquiry.
- Product Specific functionality of CallForPrice.

## Installation

There are two ways of installing extension in magento2.

- Using COMMAND LINE.
- Manually Install extension.

### **Option 1: Magento 2 install extension using COMMAND LINE** (Recommended)

Follow below steps to install extension from the command line.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

**Step 3:** Disable the cache under System -> Cache Management.

**Step 4:** Enter the following at the command line:

```
Php bin/magento setup:upgrade  
Php bin/magento setup:static-content:deploy
```

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to **Store → Configuration → Mageants → AskForPrice**, the module will be displayed in the admin panel.

## Option 2: Magento 2 install extension manually

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

**Step 3:** Disable the cache under System -> Cache Management Edit app/etc/config.php file and add one line code:  
'Mageants\_AskForPrice' => 1

**Step 4:** Disable the cache under System -> Cache Management

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Menu **Store → Configuration → Mageants → AskForPrice**, the module will be displayed in the admin panel.

## Backend Example:

After Installation of Extension login to magento admin panel to set configuration of the extension.

### Extension menu and submenu

### Extension configuration

The screenshot shows the 'Configuration' page for the 'ASK FOR PRICE' extension. The left sidebar lists various modules: DASHBOARD, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The 'ASK FOR PRICE' module is selected and highlighted. The main configuration area shows sections for 'Enable/Disable' and 'General'. Under 'Enable/Disable', there is a dropdown for 'Enable Ask for Price [store view]' set to 'Enable'. Under 'General', there are three dropdowns: 'Enable Add to cart [store view]' set to 'Enable', 'Show Add to Compare [store view]' set to 'Yes', and 'Show Add to Wish List [store view]' set to 'Yes'. Three specific configuration items are highlighted with orange boxes: 'Enable/Disable Module', 'Enable/Disable Add to Cart', and 'Show/Hide Add to Compare'. Arrows point from these highlighted boxes to their respective configuration fields in the 'General' section.
