Preface

Custom Option Image for Magento 2 extension allows admins to add images/colors to custom options of products. It supports uploading unlimited images and assigning to custom options of different types, such as drop-down, multiple select, checkbox, radio button.

Add image to Custom Options

- Easily assign, edit and remove particular image for different custom options of select type.
- Admin can set different height and width of the image to be displayed for options of different input types.

Installation

There are two ways of installing extension in magento2.

- Using COMMAND LINE.
- Manually Install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended)

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management.

Step 4: Enter the following at the command line:
Php bin/magento setup:upgrade
Php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Menu **STORES** → Configuration → Mageants → Custom option image, the module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management Edit app/etc/config.php file and add one line code:
'Mageants_Customoptionimage' => 1

Step 4: Disable the cache under System -> Cache Management

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Menu **STORES** → Configuration → Mageants → Custom Option Image, the module will be displayed in the admin panel.

Backend Example:

After Installation of Extension login to magento admin panel to set configuration of the extension.

As per below screen shot you can set all the settings here.

Extension Configuration

Scope: Default Config ? Save Config
