## Preface

- Social Login is a perfect extension for the store owners who wants Ajax Login and registration functionality for the front customer using social Login.
- Social Login and Registration force customer to stay on page without refresh the page content.
- Social Login and Registration is fast and time saving process.
- Using this extension admin can force customer to stay on page and register or Login to our site using social sites.
- Admin can enable Social Login or Registration or Both of this functionality for customer.
- Admin can configure the social Login form from Backend and set the pages for display this social Login form.
- Admin can also manage redirection operation after successful login or registration for customer.
- A popular way to customer attract to our site.

## Installation

There are two ways of installing extension in magento2.

- Using COMMAND LINE.
- Manually Install extension.

### **Option 1: Magento 2 install extension using COMMAND LINE** (Recommended)

Follow below steps to install extension from the command line.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

**Step 3:** Disable the cache under System -> Cache Management.

**Step 4:** Enter the following at the command line:  
Php bin/magento setup:upgrade  
Php bin/magento setup:static-content:deploy

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to **Store** → **Configuration** → **Mageants** → **Social login**, the module will be displayed in the admin panel.

## Option 2: Magento 2 install extension manually

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory If code Directory does not exists then create.

**Step 3:** Disable the cache under System -> Cache Management Edit app/etc/config.php file and add one line code:  
'Mageants\_Social login' => 1

**Step 4:** Disable the cache under System -> Cache Management

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Menu **Store** → **Configuration** → **Mageants** → **Social login**, the module will be displayed in the admin panel.

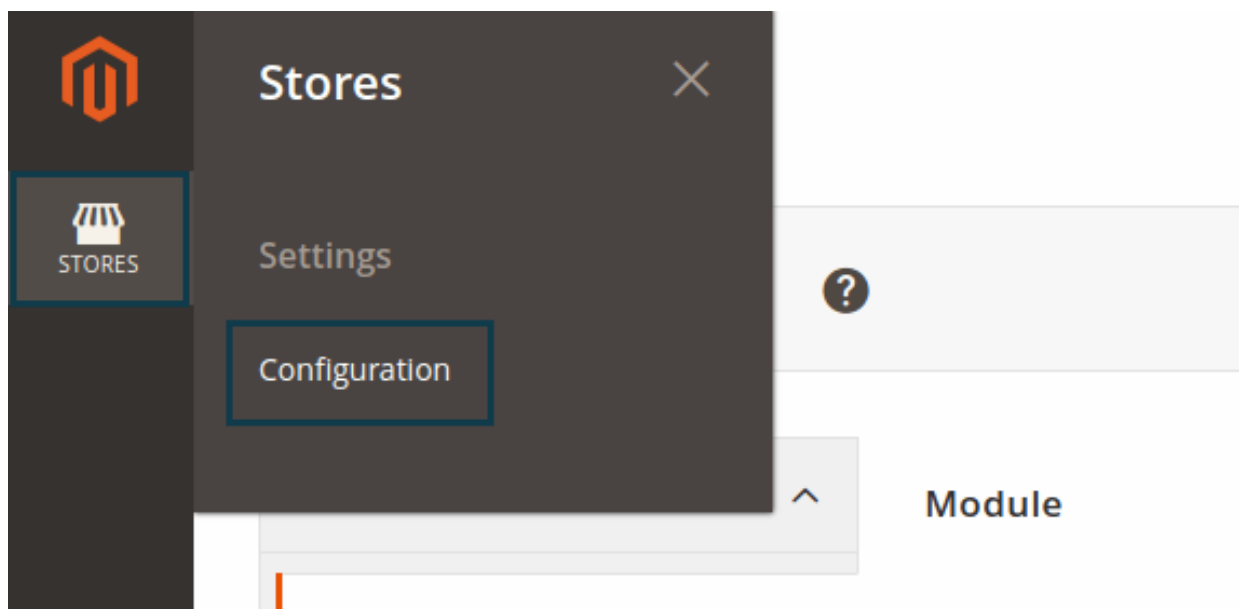

## Backend Example:

After Installation of Extension log in to magento admin panel.  
Then redirect to store → configuration for the extension config.

As per below screen shot you can set the Module configuration for the extension.
