Preface

- This extension will allow customers to save shopping carts and create lists of frequent purchases. Help your customers to plan their shopping to ensure more deals and will get more information about your customer's taste, needs and habits.
- With Magento Multiple Wishlist extension the items remain in the list after adding in to cart, so the list can be reused as many times as needed. Also if the customer abandons the cart at some point, the favorite products list will be another reminder of unfinished order. Just let your customers find products save them to a wishlist - and they will buy them.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Multiple Wishlist . The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management Edit
app/etc/config.php file and add one line code: 'Mageants_Multiple
Wishlist → 1

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the
admin panel and switch to Stores → Configuration → Mageants →
Multiple Wishlist, the module will be displayed in the admin panel.

Backend example
