## **Preface:**

- People look for new and attractive things. It became necessary to do something new that attracts customers. One of the way is to display different kind of labels on product. Mageants has better solution for your labels. You can generate different dynamic product label with help of Product label extension which is developed by Mageants team.

## Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

**Option 1:** Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory.  
If code directory does not exists then create.

**Step 3:** Disable the cache under System → Cache Management.

**Step 4:** Enter the following at the command line:  
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Product label.  
The module will be displayed in the admin panel.

**Option 2:** Magento 2 install extension manually.

**Step 1:** Download the extension and unzip it.

**Step 2:** Upload it to code directory in your magento installation's app directory. If code directory does not exists then create.

**Step 3:** Disable the cache under System → Cache Management Edit app/etc/config.php file and add one line code: 'Mageants\_Product label' → 1

**Step 4:** Disable the cache under System → Cache Management

**Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Product label, the module will be displayed in the admin panel.

## Backend example

After Installation of Extension login to magento admin panel to set configuration of the extension.

## Extension Configuration

**Minimal discount amount :** Here Minimal discount amount to display with product label as per rounding of percentage rules.

**Minimal discount percentage :** Here Minimal discount percentage to display with product label as per rounding of percentage rules.

**Rounding of discount percentage :** Use of rounding discount to display percentage and amount.

If you set **discount amount 2.4** and **discount percentage 5.6** then value display in label as per below rounding selected option.

**1) The next lowest integer value :** Discount amount/percentage show lowest integer base value.

Discount amount :- 2

Discount percentage :- 5

**2) By rules of mathematical rounding** : Discount amount/percentage show mathematical rounding base value.

Discount amount :- 2

Discount percentage :- 6

**3) The next highest integer value** : Discount amount/percentage show highest integer base value.

Discount amount :- 3

Discount percentage :- 6

The screenshot shows the configuration interface for the 'Product Labels' extension. On the left, a sidebar lists 'MAGEANTS' (expanded), 'Part Finder', 'Product Labels', and 'GENERAL'. The main area is titled 'Configuration' and shows 'Store View: Default Config'. A 'Save Config' button is in the top right. A yellow notification bar says 'It's time to change your password.' Below this, the 'GENERAL' section is expanded to show 'General Options', 'On Sale Condition', and 'Is New Condition'. The 'Is New Condition' section has two dropdown menus, both currently set to 'No'. The first dropdown is labeled 'Use `New from Date` and `New to Date` [store view]' and the second is labeled 'Use `Creation Date` [store view]'. Two orange callout boxes with arrows point to these dropdowns. The top callout box says 'Use new from date to new to date with "IS NEW" condition' and points to the first dropdown. The bottom callout box says 'Use product creation date with "IS NEW" condition' and points to the second dropdown.
