Front-end Example	9

Preface

- If customers sell their products on a variety of channels, such as Google Shopping, Amazon, etc and these channels use the same database, then they can automatically update their items by importing the exported data files from the original channels.

- Thanks to this, store owners can save more time and manage their sales channels.

Installation:

There are two ways of installing extension in magento2.

- Using COMMAND LINE.
- Manually Install extension.

Option 1: Magneto 2 install extension using COMMAND LINE (Recommended)

Follow below steps to install extension from the command line.

: - Install Below library using this command.

sudo composer require liquid/liquid

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magneto installation's app directory If code directory does not exists then create.

Step 3: Disable the cache under System -> Cache Management.

Step 4: Enter the following at the command line: pp
bin/magneto setup:upgrade

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to **Stores -> Configuration -> Mageants -> Product Feed** , the module will be displayed in the admin panel.

Option 2: Magneto 2 install extension manually

- Step 1:** Download the extension and unzip it.
- Step 2:** Upload it to code directory in your magneto installation's app directory. If code directory does not exist then create.
- Step 3:** Disable the cache under System->Cache Management. Edit app/etc/config file and add one line code: '**Mageants_Product Feed**' => 1.
- Step 4:** Disable the cache under System -> Cache Management
- Step 5:** Once you complete above steps log out and log in back to the admin panel and switch to **Stores -> Configuration -> Mageants -> Product Feed**, the module will be displayed in the admin panel.

Back-end Example :

After Installation of Extension login to Magento admin panel to set configuration of the extension.

CONFIGURATION

You will find below configuration at this path **Stores -> Configuration -> Mageants -> Product Feed**

The screenshot displays the 'Configuration' page for the 'Product Feed' extension. The left sidebar shows the navigation menu with 'STORES' selected. The main content area is titled 'Mail Settings' and includes a 'Save Config' button. The settings are as follows:

- Enable [global]:** A dropdown menu set to 'Yes'. Callout: **Enable/Disable E-mail**
- Email Sender [store view]:** A dropdown menu set to 'General Contact'. Callout: **E-mail Sender**. There is a checked box for 'Use system value'.
- Confirmation Template [store view]:** A dropdown menu set to 'Mageants ProductFeed Template (Default)'. Callout: **Select Template**. There is a checked box for 'Use system value'. A note below states: 'Email template chosen based on theme fallback when "Default" option is selected.'
- Send Email To [store view]:** A text input field containing 'test@gmail.com'. Callout: **Set Email Address**
- Send Mail When [store view]:** A section with two options: 'Generated successfully' and 'Generated error'. Callout: **To Set Send Mail**

Enable E-mail : From here you can enable/disable e-mail by selecting Yes or No as per your requirements.

Email Sender : To set the value that will send the email.

Confirmation Template : Select Custom Email template for send E-mail.

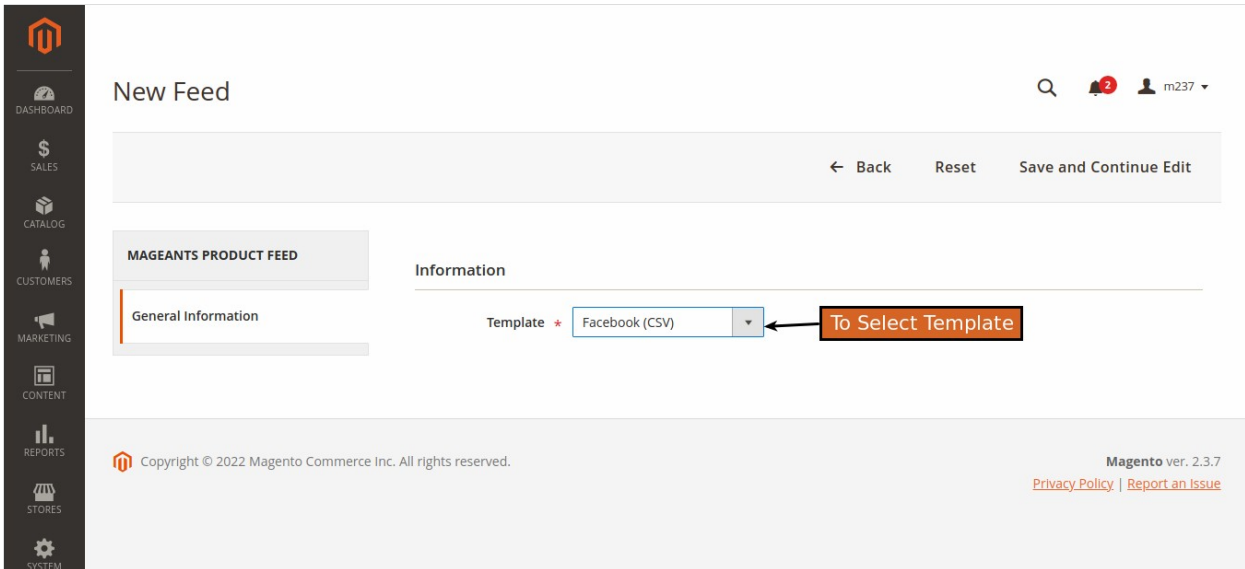

Email Send : Set the email address to which to mail.

Send Mail : To select the success and error message.

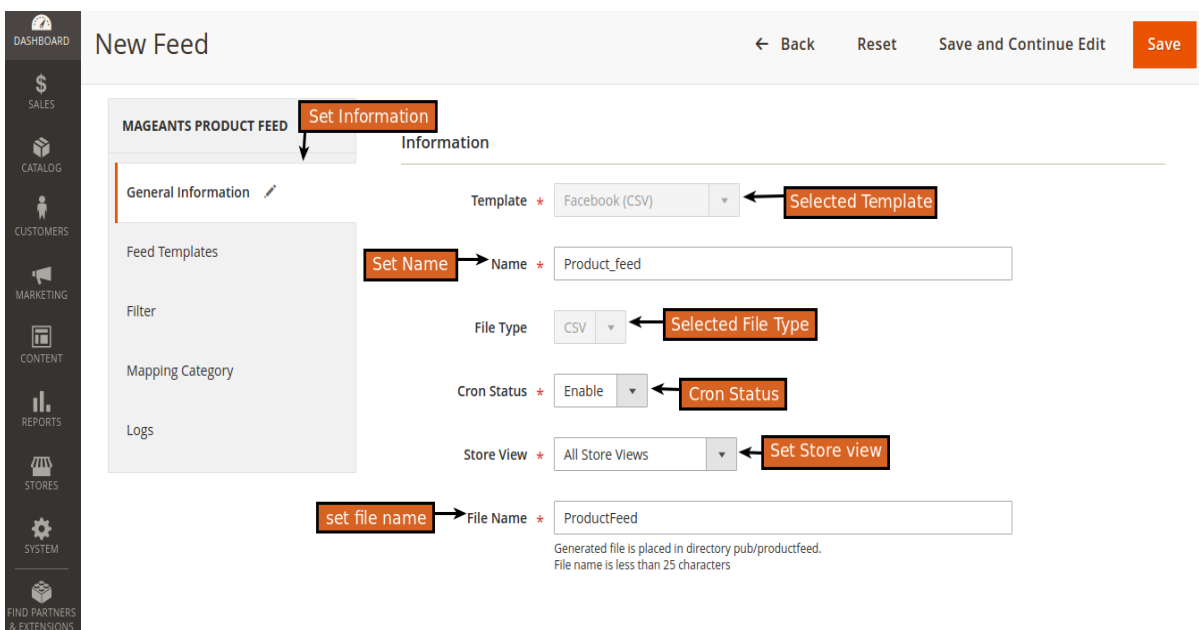

The screenshot shows the Mageants ProductFeed admin interface. On the left is a sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, and Reports. The main area has a search bar, a notification bell with '2' alerts, and a user profile 'm237'. Below this is a 'Generate New Feed' button with a right-pointing arrow and a 'New Feed' button. Further down are 'Filters', 'Default View', and 'Columns' options. A pagination bar shows '5 records found', '20 per page', and '1 of 1'. The main content is a table with the following data:

<input type="checkbox"/>	ID	Feed Name	File Name	Cron Status	Store	Action
<input type="checkbox"/>	1	Reema	Reema	ENABLE	All Store Views	Select ▾
<input type="checkbox"/>	2	Reema1	Reema1	ENABLE	All Store Views	Select ▾

- This is where all created feeds are displayed.
- Here admins can have basic information of the feed such as : ID, Feed Name, File Name, Creon Status, Store, Action.
- Admins can select Action if they want to Delete, Edit.

- To Select the Template Type and Save and Continue.

- To Full Fill the General Information for Feed Related.
