Preface

- Store Pickup is perfect extension for the store owners who wants to Magento Store Pickup acts as a Magento shipping extension.
- The Store Pickup extension adds a new shipping method which allows customers to pick up their orders in the nearest store or any other pickup location. During checkout they can option for select the nearest store & choose preferred the day and hour to pickup their orders from the drop down, and get the required items there.
- admin can easily add as many pickup locations as you wish.
- Specify the pickup location name, address, working days, telephone, etc.
- Store's days off are also disabled on calendar so that customers will know and choose another suitable pick-up date and time.
- User Friendly and flexible configuration.
- easy to Enable/Disable shipping method.
- customer can show all the places where you sell.
- Store Locator is perfect extension for the store owners who Have multiple store in one site. And they want to display their all store in front end side. In this extension admin can create multiple store and configure the extension. As per configuration and store list in front storelocator page displayed. Where user can find the store as well as find the distance from his current location to store.
- The functionality we can discribe as follow.
- Admin can create multiple Store from backend.
- Google map is use for Display store and current location for the customer.
- Admin get latitude and longitude value on one click.
- In store creation time admin can also see the map for location of current creation store on button click.
- Admin can set the store available product when creating a store.
- Admin can also setup the marker template for the store.

- In from store listing display in the left side of the locator page.
- Customer can find the current location to radius distance store available.
- In product page customer can also find the available store for the products on one click.

Installation:

There are two ways of installing extension in magento2.

- 1) Using COMMAND LINE.
- 2) Manually install extension.

Option 1: Magento 2 install extension using COMMAND LINE (Recommended).

Follow below steps to install extension from the command line.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management.

Step 4: Enter the following at the command line:
php bin/magento setup:upgrade
php bin/magento setup:static-content:deploy

Step 5: Once you complete above steps log out and log in back to the admin panel and switch to Stores → Configuration → Mageants → Store pickup.
The module will be displayed in the admin panel.

Option 2: Magento 2 install extension manually.

Step 1: Download the extension and unzip it.

Step 2: Upload it to code directory in your magento installation's app directory.
If code directory does not exists then create.

Step 3: Disable the cache under System → Cache Management Edit
app/etc/config.php file and add one line code: 'Mageants_Store pickup' →
1

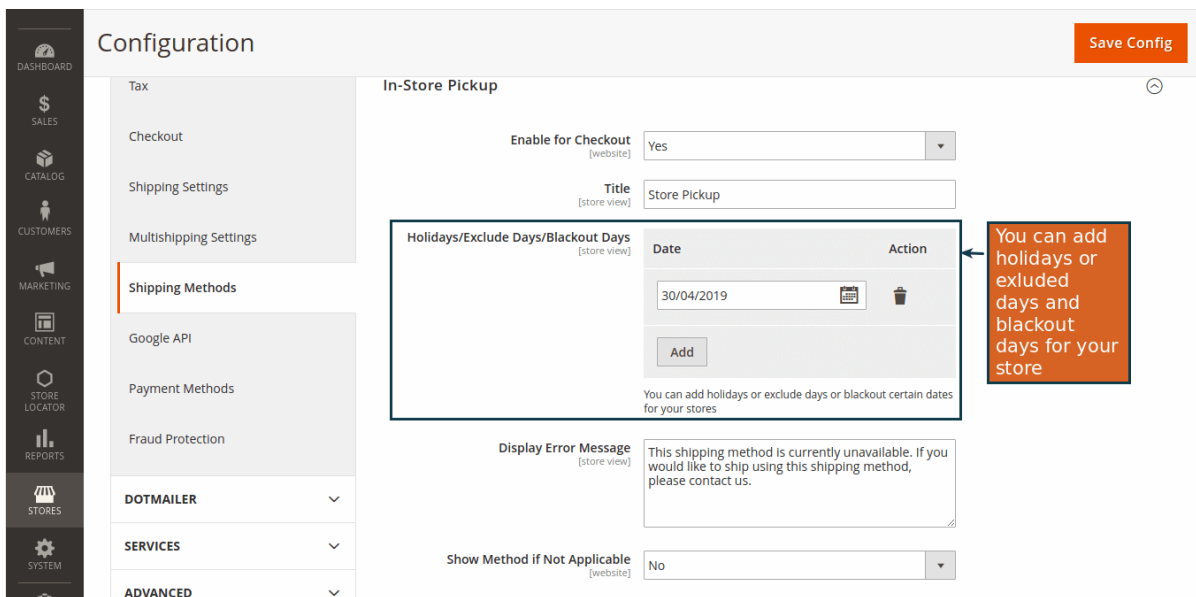

Step 4: Disable the cache under System → Cache Management

Step 5: Once you complete above steps log out and log in back to the
admin panel and switch to Stores → Configuration → Mageants →
Store pickup, the module will be displayed in the admin panel.

Backend configuration

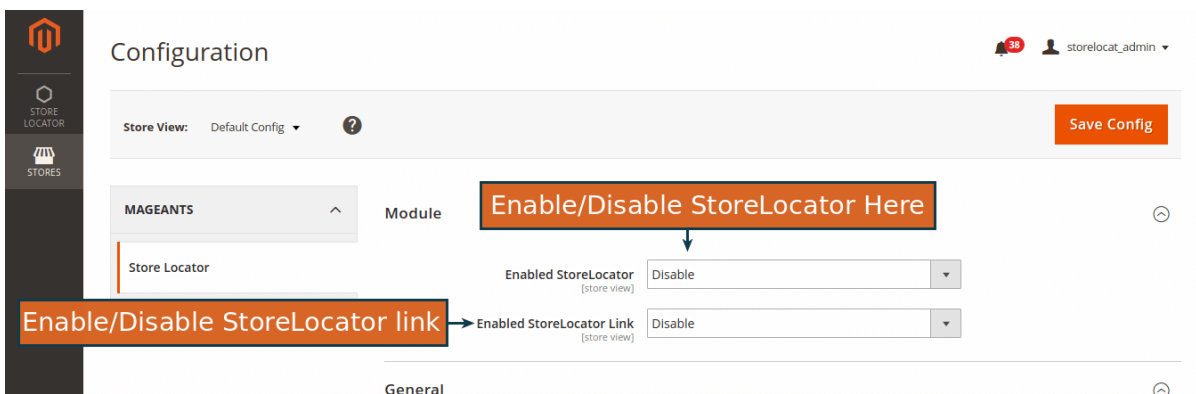

After Installation of Extension log in to magento admin panel for set configuration of the extension.

as per below screen shot you can set all the stores detail's & date time settings here.

The screenshot shows the 'Configuration' page for the 'In-Store Pickup' shipping method. The left sidebar contains navigation links for Dashboard, Sales, Catalog, Customers, Marketing, Content, Store Locator, Reports, Stores, and System. The main content area includes a 'Save Config' button and a 'Holidays/Exclude Days/Blackout Days' table. An orange callout box points to the 'Add' button in the table, stating: 'You can add holidays or excluded days and blackout days for your store'. Below the table, there is a 'Display Error Message' section with a text area containing the message: 'This shipping method is currently unavailable. If you would like to ship using this shipping method, please contact us.' and a 'Show Method if Not Applicable' dropdown set to 'No'.

Extension Configuration

The screenshot shows the 'Configuration' page for the 'Store Locator' module. The left sidebar contains navigation links for Dashboard, Sales, Catalog, Customers, Marketing, Content, Store Locator, Reports, Stores, and System. The main content area includes a 'Save Config' button and a 'General' section. An orange callout box points to the 'Enabled StoreLocator' dropdown, stating: 'Enable/Disable StoreLocator Here'. Another orange callout box points to the 'Enabled StoreLocator Link' dropdown, stating: 'Enable/Disable StoreLocator link'. Both dropdowns are currently set to 'Disable'.
